---

## Profile

Backend Developer experienced in building scalable, secure, and efficient systems. Skilled in Python, NodeJS, Rust, Django, PostgreSQL, GraphQL, and cloud platforms. Proven experience in leading small teams, integrating complex APIs, and optimizing backend performance in production grade applications. Passionate about blockchain, distributed systems, and cloud infrastructure, with strong interest in DevSecOps practices including CI/CD, containerization, and monitoring.

---

## Experience

### Backend Developer | Golden Technosoft

*July 2025 - Present*

Built a scalable backend for a decentralized marketplace, integrating multiple APIs to enhance functionality and performance. Designed and maintained secure RESTful and GraphQL endpoints using Express and Prisma ORM, collaborated with a small cross-functional team to deliver features ahead of schedule, and deployed services on Google Cloud Platform with containerized infrastructure and CI/CD pipelines.

### Frontend Developer | Hyperce Technology

*May 2024 - oct 2024*

Developed a headless eCommerce platform using Remix, Vendure, and GraphQL, implementing reusable Angular components and responsive frontend design. Contributed to backend modules for product management, user authentication, and order processing, working across full-stack development cycles to ensure seamless frontend-backend integration.

---

# Projects

## DataSnap - Cybersecurity Data Tracking Platform

Tools: Next.js, Express.js, Prisma, GCP, Cloudinary

Built a robust cybersecurity platform designed to monitor, analyze, and visualize user data across multiple sources. Developed the backend infrastructure for secure data collection and management using Prisma ORM. Implemented authentication, file handling, and real-time tracking features to ensure data integrity and transparency. Deployed and managed the platform on Google Cloud Platform (GCP) with Cloudinary integration for efficient media and log storage. Link: <https://datasnap-eight.vercel.app/>

## Vizeo - Video Sharing Platform

*Tools:* React Native, Express, Cloudinary, AWS

Built a video sharing platform with smooth streaming, uploads, and real time updates. Developed RESTful APIs using Express, managed media content through Cloudinary, and deployed scalable services on AWS for reliability and performance. Ensured backend efficiency, caching, and smooth integration with the React Native frontend.

---

# Education

## Bachelor of Computer Application (BCA)

Tribhuvan University, Lumbini City College

*(Graduation: 2025)*

---

# Technical Skills

**Languages:** JavaScript, TypeScript, Python, SQL, Rust

**Frameworks & Tools:** Node.js, Express, Django, GraphQL, Prisma, Docker, PostgreSQL, Redis

**Cloud & DevOps:** GCP, AWS (basic), CI/CD, Cloudinary, GitHub Actions

**Frontend:** React.js, Next.js
